💼 Portfolio Highlights – Data & Analytics Projects

📊 Retail Sales EDA Analysis – Portfolio Project

- **Problem / Goal:** Identify profitability gaps across product categories and provide actionable insights, focusing on Furniture.
- **Actions Taken:** Cleaned and standardized dataset, calculated KPIs, profit margins, and visualized category/sub-category performance.
- **Key Results:** Furniture underperforming: Tables (-$17,725), Bookcases (-$3,472); Technology and Office Supplies strongest categories.
- **Recommendations:** Optimize production costs, pricing, discounts, and rationalize product portfolio.
- **Tools Used:** Excel | Python (pandas, matplotlib) | Data Visualization
- **Outcome:** Ready-to-use executive insights with actionable recommendations and charts for decision-making.

🐾 Animal Dataset Cleaning – Portfolio Project

- **Problem / Goal:** Clean and prepare a messy dataset of European animal observations for analysis.
- **Actions Taken:** Standardized column names, fixed date formats, converted numeric/categorical columns, removed empty columns, and filled missing values.
- **Key Results:** Dataset fully cleaned with no missing values; ready for analysis and visualization.
- **Tools Used:** Python (pandas, numpy) | Data Cleaning & Transformation
- **Outcome:** Clean, ready-to-analyze dataset enabling robust insights and reporting.
